

GROUP 3: ASSETS WORTH MORE THAN \$2,200

Workshop 3: Our Choices

Xiao Dan

I am 13 years old and a youth AIDS Ambassador for UNICEF from China. I have experienced first hand the discrimination that comes from having AIDS.

My family was very poor, my mum you to sell her blood to make money. She became infected with HIV and later died of AIDS. After she died, my Grandfather took me in. I moved from the city to a rural village where everyone was afraid of me. At first I was afraid of the disease but I have learned not to be.

[See Xiao Dan's video here](#)

“My biggest wish is to see my family live happily ever after.”

China?

What is HIV / AIDS and where is the disease most prevalent?

How do you make sure medicine is available to people living in poverty?

How do you prevent the discrimination of people with the disease?
